Sabre

A Gunner and/or Commander's sight for small to medium turret systems. Configurable as a Day, Night or Thermal sight with optional Laser Range Finder.

PRODUCT DATASHEET

Sabre has been selected for service with numerous armed forces around the world and therefore represents a popular electro-optical solution. Sabre's design is proven and qualified, a flexible asset from which a number of variants have been derived. Configurable as a Day, Night or Thermal sight with an optional Laser Range Finder (LRF).

Developed originally for vehicles with small to medium sized turrets and cupolas, Sabre is designed to fit within a very compact space envelope. As a result it can be configured to fit most armoured fighting vehicles. It's day and night fighting capability, when combined with a LRF, makes Sabre the complete solution at a competitive price.

Capabilities

- Surveillance
- Target acquisition
- Engagement
- 24 hour capability
- Auxiliary sighting system

As part of our policy of continuous product improvement, we reserve the right to change specifications at any time.
